

ERMES NEWSLETTER

n° 1/2015

ERMES project aims to develop pre-operational downstream services dedicated to rice farming systems based on the assimilation of Earth Observations (EO) products and in-situ data within crop modeling solutions.

FOCUS ON

1st ERMES annual meeting

On last 26-27th March 2015, ERMES partners and end-users from Italy, Greece, Spain and Switzerland attended the **first ERMES annual meeting** in Valencia (Spain). Researchers' presentations, a short description of the first results achieved and the meeting's photo gallery are available [here](#).

ERMES DEVELOPMENTS

First year ERMES activities and results

We shortly describe [here](#) the ERMES **measurement campaigns** conducted from June to September 2014 in the three study areas: Italy, Greece and Spain. ERMES research staff is now planning the 2015 field activities calendar.

At [this page](#) you can find the main ERMES **achievements** obtained during the first year of project's activities and the **research prototypes** so far designed.
